

# LEGACY PLATINUM<sup>™</sup> SYSTEM

MAINTENANCE FREE POWER  
from DOUGLAS BATTERY

## The Legacy Platinum System CFR Charger

is the perfect compliment to the Legacy Platinum series of sealed batteries. Utilizing state-of-the-art controlled ferro-resonant technology, the Legacy Platinum protects your previous battery investments with its enhanced charge profiles. This allows the charger to be used in conjunction with both sealed and flooded batteries, saving money on potential equipment upgrades. Each charger is backed by a ten-year warranty and supported by over 75 years of Douglas Battery experience and service.

See your Douglas Battery dealer today and find out how the Legacy Platinum CFR chargers can keep your motive power fleet on the move.

LEGACY PLATINUM  
CHARGER / CFR

# LEGACY PLATINUM™

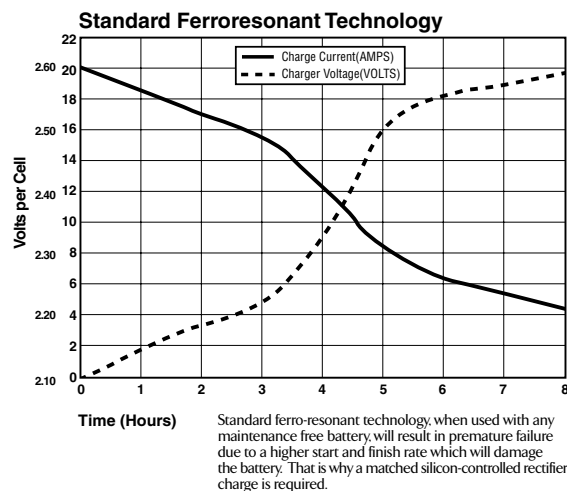

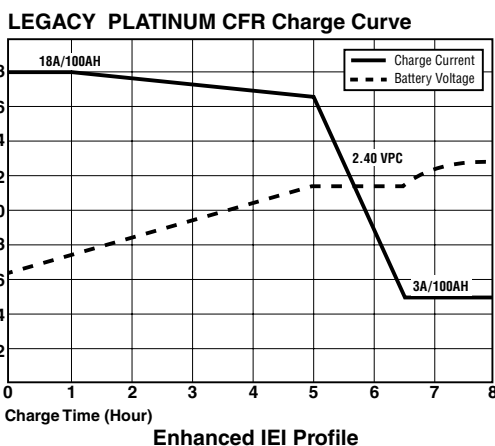

## PERFORMANCE FEATURES:

- Programmable Charge Profile enables charger to be used on sealed and flooded batteries
- Enhanced I-EI Charge Profile improves recharge time
- DV/DT Termination for the precise control of the charging cycle
- Slow Start Current Ramp-Up prevents premature gassing
- Optional Remote Display Unit resumes charging at proper point in case of power failure

The Legacy Platinum CFR Charger effectively manages the charge cycle, protecting against the effects of overcharging and overheating. At the same time, the Legacy Platinum Charger guards against undercharging, which can lead to loss of capacity.

You'll notice lower AC energy costs, since charging is managed and terminated more accurately. Cumulatively, you'll find this superior charge management process slows the battery aging process, resulting in a significantly positive overall effect on performance and productivity.
